Gamboling thru the Galapagos

Thursday, Feb 19 2:00-3:30 pm **Dobson Campus** Room: **BP 4**

Presenter: Jay Mark **Facilitator:** Need Facilitator

For millions of years, 18 islands sat alone more than 800 miles out in the Pacific Ocean, undisturbed by outside influences, generating a micro-ecological environment unlike any other place on earth. They remained unseen by man until the 16th century. But with a lack of fresh water, they were only considered a hostile curiosity...until Charles Darwin introduced the marvel of the Galapagos Islands to the world in his 1859 book On the Origin of the Species. Today the Galapagos remain an exceptional research and teaching laboratory, while the number of tourists are carefully controlled and monitored. Only about 275,000 visit the mystical archipelago each year, compared to 10.2 million at The Louvre in Paris. They are a remarkable preserve of unique plant and animal diversity, and pristine beauty. <https://us02web.zoom.us/meetings/82916572966/invitations?signature=Xl48S1WA9D1e9dw1wF2Xeu8puGJaFYkRZ8oBPLSPdYY>

Facilitator: Suzanne Brown

The United States faces significant dangers and opportunities in the coming century. Malicious actors have harnessed new technologies such as drones, missiles, and offensive cyber weapons to threaten and, in some cases, attack America and its allies. Since the end of the Cold War, US foreign policy and national security strategy have suffered from strategic narcissism—the tendency to define complex challenges and opportunities abroad only in relation to the United States—and to underappreciate the interests, emotions, and aspirations that drive and constrain rivals, adversaries, and enemies. Former US National Security Advisor H. R. McMaster designed and delivers this 12-lecture, six-sessions series.

History of the 14th Amendment

Thursday, Apr 16, 23 2:30 - 4:00 pm **Dobson Campus** Room: **BP 4**

Presenter: Robert McWhirter **Facilitator:** Need Facilitator

America is "freedom" and "rights" – or so most of us say. If pressed, we say we have "civil rights," an ubiquitous category of entitlements going back to the Declaration of Independence, the Constitution, or even the Magna Carta. The Fourteenth Amendment (1868) gives this discussion its constitutional foundation. It expresses Thomas Jefferson's Declaration of Independence that "all men are created equal" and Lincoln's Gettysburg Address that "this country was conceived in liberty and dedicated to the proposition that all men are created equal." The broadest and longest Civil War Amendment, the Fourteenth, is the platform of many of today's culture wars, as its framers intended.

The Fifteenth Amendment: Dropping the Musket to Reach for the Ballot

Thursday, May 7 2:30 - 4:00 pm **Dobson Campus Room: BP 4**

Presenter: Robert McWhirter **Facilitator:** Need Facilitator

Black men picking up muskets to fight for their own freedom are the Fifteenth Amendment's genesis. The Fifteenth Amendment prohibits the federal government and each state from denying a citizen the vote because of his "race, color, or previous condition of servitude." The Fifteenth's purpose was to strike at official efforts to impede African Americans from voting, a purpose as relevant today as ever. America's greatness is in its persevering in the slow fight to realize its promise.

I Was a Perfect Child, But There Was That One Time

Tuesday, March 3 1:00 - 2:30 pm **Dobson Campus** Room: **BP 3N**

Presenter: Duane Roen, PhD **Facilitator:** Need Facilitator

Of course, all of us were perfect children. However, there may have been a time or two—no more than that—when we fell short of angelic behavior and fell into the depths of naughty behavior. Perhaps we weren't quite truthful when we explained that the dog ate our homework. Or maybe it was not accurate to say that a passerby threw a rock through the window. Or maybe it wasn't by accident that dish soap was added to a sibling's orange juice. Or maybe the baby sister did not give herself a buzz cut. We will begin this session by sharing a few childhood stories about that one time when we were not perfect children.

After that, we will each write about one moment—hopefully humorous—in childhood when we fell short of being perfect.

Alcoholism touches many families, yet true recovery requires more than just quitting drinking. In this candid and revealing session, Kate Mohler, an English professor and speaker with ten years of sobriety, shares how understanding brain chemistry, temperament, and neurodivergence can transform how we view addiction. Kate's journey—from lifelong heavy drinking to bipolar diagnosis to discovering she is autistic—reveals how alcohol often becomes a coping mechanism for overstimulation, anxiety, and emotional intensity. People who drink heavily are not weak-willed or self-destructive; they are neurodivergent individuals trying to right their inner world. This session explores what needs to change beyond abstinence for real recovery, how emotional dysregulation shapes drinking habits, why AA alone may not address underlying neurological and emotional needs, and paths toward healing that integrate medication, therapy, and self-understanding. Through personal story and practical insight, Kate reframes addiction as a complex, human response to an overwhelming world—and offers hope for deeper, sustainable recovery.
