Thursday Early Morning Bike Ride

Enjoy an early morning bike ride of 15 miles maximum. The rides are along the established paved canal paths in the Mesa/Gilbert/Tempe and east Phoenix area. A number of the bike routes repeat so I do my best to mix up the starting locations. I try to email a new starting location by Tuesday evening.

The summer mornings are still warm so I plan on meeting at 7:15 am and begin riding by 7:30 am. Following some of the rides, we might stop for a refreshment if a location is nearby.

My disclaimer: The route is relatively flat but there are hills going over/under roadways and other man-made features. I tend to follow the main paths and try not to deviate. There are many side access paths which at times can be confusing. If one decides to return to their car early, either wait for us to return or take your time and think about the route taken. I carry a cell phone when riding but it's not easily accessible nor do I always hear it.

Location: TBD
Dates: Thurs, June 2-30, July 7-28 & Aug 4, 2022
Time: 7:15-10:00 a.m.
Sessions: 10
Facilitator: Allan Zisner 480-282-1686 azisner@q.com

Please contact the facilitator if interested in participating on the rides or have questions.

HISTORY

12 Women Who Shaped America: 1619 to 1920

This Great Course focuses on 12 influential women who defined the history of the United States. It covers the period from the nation's founding through 1920, when the 19th Amendment altered women's relationships with politics.

You'll learn about women who drove the American Revolution as tea boycotters, farmers, entrepreneurs, and even soldiers. Phillis Wheatley Peters penned popular lines to secure support for liberty and the rebellion. And, as the new nation formed, First Lady Martha Washington became its founding mother and established a model for women.

1066: The Year that Changed Everything

On October 14, 1066, on a ridge 10 miles northwest of the village of Hastings, William of Normandy defeated Harold Godwinson in a contest for the English throne.

In the centuries since, historians have debated the significance of this event, and current trends stress continuity between the periods before and after the battle. While it can be argued that, for many English people, life under King William went on much as it had before, it is also undoubtedly true that England as a nation had a different character and a different place in European affairs after the Norman Conquest.

This DVD Great Course will explore how events of many decades, not just in England and Normandy but in Scandinavia, France, Rome, and even Constantinople, affected the Norman Conquest. We will also examine the means William used to secure his new kingdom, sometimes violent, sometimes diplomatic and how the English people saw these events, both at the time and in the centuries since.

America's Long Struggle against Slavery Part 2

"How do you slay a many-headed monster? How do you defeat an economic system deaf to the cries of conscience and morality? How do you destroy an entrenched special interest that profits from treating people like property?"

For three centuries, men and women committed to resisting the spread of slavery in British North America and the new United States grappled with these questions, searching for ways to save themselves and others from the dehumanizing consequences of commodification.

This course offers a rare chance to step into their shoes. As we examine the different tools and tactics, means, and methods that Americans, both black and white, have used to escape slavery or try to exterminate it, we will confront the grand problems that animated all those who fought to end slavery.

This is a 30-part DVD Great Course which will play the second half of the course. Each session is 30 minutes with 2 parts played each week.

Given the nature of the topic, content may not be suitable for minors due to graphic pictures and offensive language."

The Everyday Guide to Wines of California is a ticket to a tour of world-class wines made in America. In just a little more than a century, the blink of an eye compared to France or Italy, California has become one of the most important and exciting winemaking regions in the world. In fact, if it were its own country, California would be the world's fourth-largest wine-producing nation. In the best American spirit, and unlike their traditional European counterparts, California winemakers are free to experiment with new blends of grapes and new technologies. In this

course, we'll taste wines from throughout California, including Chardonnay, Cabernet, Zinfandel, and Syrah, and in the final lecture, you'll get a chance to play winemaker and blend your own creation.
